

Daniel Thomas

Qualifications Summary

Patent Practitioner/Technical Professional with an M.Sc. in Computer Science and extensive legal-technical experience in patent preparation, prosecution, and complex analysis across multiple technologies. Deeply skilled in evaluating advanced software architectures, AI/ML systems, NLP frameworks, full-stack applications, metal-organic frameworks, medical technologies, and pharmaceuticals. Backed by a strong analytical foundation in physics, chemistry, and mathematics, proven at translating complex technologies into robust patent applications, validity/infringement evaluations, and freedom-to-operate analyses.

Professional Experience

Patent Practitioner

Shackelford, McKinley & Norton (Remote): February 2024 – Current

Patterson + Sheridan (Remote): April 2023 – February 2024

Winstead PC (Dallas, TX): April 2017 – April 2023

Conducted deep technical analysis of complex software architectures and AI/ML systems, evaluated system designs, algorithms, and implementation details. Prepared and prosecuted patent applications related to software, chemistry, life science, pharmaceuticals, medical devices, metal-organic frameworks, and batteries. Analyzed patents, patent publications and non-patent literature in support of patent litigation. Prepared patentability, validity and infringement analysis. Prepared freedom to operate analysis.

Selected Practice Areas:

- └ Artificial intelligence, machine learning, and natural language processing
- └ Metal-organic frameworks and batteries
- └ Medical devices and targeted drug delivery platforms

Asset Manager

Superior Energy Services: (Houston, TX): May 2014 – September 2016

Manage teams responsible for asset tracking/utilization, asset maintenance and equipment certifications. Acted as subject matter expert for equipment and was acting technical liaison between operations and accounting groups. Managed processes and designed new workflows to increase productivity between operations and accounting.

Selected Accomplishments:

- └ Implemented a computerized maintenance management system that increased preventative maintenance from 9% to 97% of overall maintenance, decreasing the overall cost of reactive maintenance while increasing profit
- └ Managed and assisted in the development of the Integrated Production Services' Well Intervention Operations Manual

Global Advisor

Halliburton Energy Services (Houston, TX): June 2007 – August 2013

Managed concurrent projects for multiple clients globally. Prepared technical writings for clients while providing global technical support internally. Prepared job designs and reviewed procedures submitted by regional field engineers. Made recommendations for required equipment to complete the client's desired scope of work. Discussed limitations and possible job or equipment failure scenarios while recommending and developing contingency plans for the potential failures. Developed project reports which included metallurgical fatigue profiles indicating maximum allowable fatigue and other relevant calculations.

Selected Accomplishments:

- └ Dedicated Engineer for BP Angola Block 31 System Integration Test – Created technical drawings for down hole tools and equipment layouts, and wrote all contingency plans for subsurface safety valve operations during deep-water well intervention operations
- └ Lead Technical Advisor for BP (Muscat, Oman) – Prepared job designs, procedures and technical write-ups applicable to the scope of work to be conducted during onshore well intervention operations

Technical Skills

Programming and Scripting Languages: Python, C#, JavaScript (Node.js, React, Express), Bash, Zsh

Databases and Web Technologies: MongoDB, MySQL, full-stack development (MERN stack), RESTful APIs

Tools and Systems: Docker, Git, CI/CD (GitHub Actions), Jira, Linux, macOS, Windows

Other: Networking protocols, artificial intelligence, machine-learning, natural language processing, system architecture analysis, technical documentation

Education

Ball State University — December 2025

M.Sc. in Computer Science

University of Texas at Arlington — May 2007

B.Sc. in Physics and Chemistry (Mathematics Minor)

Magna Cum Laude Honors
